FI Jos lattiassa on kallistuksia, niin tasaa jalat niin, että porras seisoo tukevasti kaikilla neljällä jalalla.

EN In case there is some slope on the floor, even the step legs so that the step stands steadily on all 4 legs.

DE Falls der Boden eine Schräge aufweist, müssen die Beine durch entsprechendes Ablängen angepasst werden, damit das Treppchen bzw. der Schemel stabil auf allen vier Beinen ruht und nicht wackelt.

FR Si le sol est en pente, égalisez les pieds de manière à ce que le marchepied soit stable sur les quatre pieds.

FI Tärkeää, että kuminapit asennetaan aivan jalkojen ääri-laitoihin. Jos napit asennetaan jalan keskelle, on vaarana, että jakkara/porras keikahtaa.

EN It is important that the rubber badges are put on the edges of the legs. If they are fixed in the middle of the leg, the step will become unsteady and therefore unsafe to use.

DE Es ist wichtig, dass die Gummipoppen an den äußeren Ecken der Holzbeine angebracht werden. Bei mittiger Position besteht die Gefahr, dass das Möbelstück ins Wackeln gerät.

FR Il est important que les anti-dérapants soient installés sur les extrémités des pieds. L'installation au milieu des pieds risque de rendre le marchepied instable et par conséquent dangereux à utiliser.
